

Idylla™ Connect

Engage in the future

Discover the benefits of being connected

Advanced services to ensure continuity in your laboratory workflow

Automatic software updates

New releases of assay and console software are sent to your Idylla™ console and can be installed with a single touch on the screen.

Immediate and remote service and support

Idylla™ system parameters and error logs can be analyzed at anytime and anywhere to ensure swift actions and solutions.

What about privacy and data protection?

Is Idylla™ Connect safe?

The Idylla™ Connect network is built on state of **the art cyber security technology** which guarantees that only Idylla™ Systems can get access to this network. Connecting to Idylla™ Connect requires a **certificate based authentication procedure** which ensures that only Biocartis known and trusted Systems can connect. The Idylla™ Connect and Idylla™ Explore solution complies with the US FDA adopted cyber security standards of the CLSI organization, AUTO-9A (Remote Access to Clinical Laboratory Diagnostic Devices via the Internet) and AUTO11-A2 (Remote Access to Clinical Laboratory Diagnostic Devices via the Internet).

Is my data secure?

Data is transported over a single TLS (Transport Layer Security) socket between your Idylla™ System and the Biocartis server to provide **secure end-to-end confidentiality of encrypted data**. The Idylla™ Connect data transfer technology prevents tampering with the data.

What about Patient Privacy?

Idylla™ does not require patient identifying information. Idylla™ test results only reference to an **anonymous sample ID**. Biocartis recommends users to avoid including patient names or other medical information in the sample ID or annotations field.

Who can access my data?

Access to data on Idylla™ Explore is protected with **login credentials** that are associated to specific data group definitions. This architecture ensures that test result data is **only accessible by authorized persons** within the group. The Biocartis server, holding the transferred test result data, is physically located at the European Biocartis headquarters and maintained by Biocartis staff members with audit functionality.

Connect today

Get started with Idylla™ Connect and Idylla™ Explore in just 2 easy steps

1

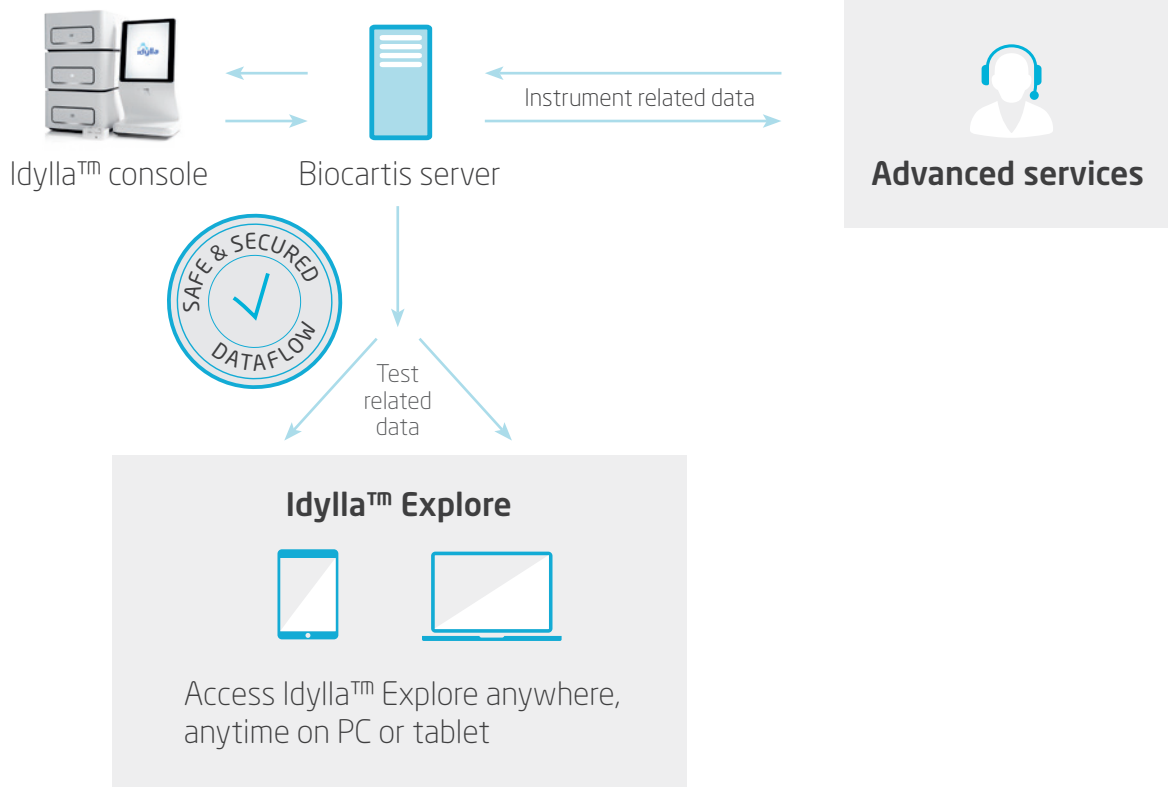

Establish an ethernet connection between the Idylla™ console and your laboratory network or a 3/4G modem

2

On the Idylla™ console:

- Enable **Idylla™ Connect**
- Enable "Allow uploading of test result data – Idylla™ Explore" for **Idylla™ Explore**

Your data is safe with us

Custom-made solutions

Biocartis offers personalised solutions that fit your individual needs

- Create a network between different Idylla™ User sites and share data and knowledge
- Direct access to your data for building your own solution
- Statistical analysis on your obtained data
- Monitoring; Follow-up of your data over time
- Disease surveillance or diagnostic grid; linking of real-time molecular diagnostic test data to geo-location and sample data

CONFIDENTIALITY STATEMENT: Biocartis will not require access to confidential patient-identifying information. Biocartis assumes that the sample ID field does not contain any patient-identifying information. Should that be the case, Biocartis will treat it as confidential information and will not use it for any purpose.

Idylla™ Explore has been developed solely as a visualization tool and does not allow any modification of reported data. Idylla™ Explore may not be available in all markets due to regulatory restrictions. Specific terms and conditions apply for the use of Idylla™ Explore.
